Hi Sean,

NW Natural is conducting a sediment investigation for DEQ (project manager Dan Hafley) in the vicinity of the Steel Bridge this week. I haven't been to the job site, so haven't seen the sampling vessel, but my guess is that is the work you observed. I will give you a call tomorrow to discuss in greater detail.

Thank you,

Bob

Subject: Neoprene clad RSS divers near Steel Bridge

Bob,

Per my voice message, here's RSS up by the Steel bridge today and yesterday--any idea for whom they might be working? I'd like to do a little outreach on proper PPE, which Eric Parker knows pretty well, but the client may not.

Thanks!

S
